ABOUT GANAPATHI PROCESS

We specialize in fabric dyeing. We have developed and honed our dyeing skills to render quality dyeing services to all our clients.

It is a Partnership Firm Founded in 1990, Mr.A.Rajendran who has a vast experience in garment industry. Under his guidance and following the same pioneering spirit it continues to cater to the demands of all our clients rendering top notch quality using latest dyeing equipment and production methods.

We are member of Veerapandi Common Effluent Treatment Plant Private Limited having capacity of 300KLD.

MISSION

Our mission is to constantly update our team with technological advancements in processing and dyeing of all kinds and to achieve highest industrial standards and quality. We wish to cater to customer requirements in relation to light fastness, wet fastness, and dry fastness from domestic and global business.

VISION

We envision a future for the generations to come by, ensuring sustainable growth, profitability and by adopting methodologies that are environmentally responsible and leave a smaller carbon footprint. We wish to be preferred leader and continue business practices that embody Eco friendly production and processing, ZDHC (Zero Discharge of Hazardous Chemicals), to achieve Bluesign standards and continual business sustainability.

GOAL

Our Goal is to be innovative in the dynamic industry to develop sustainable business practices, both in our products and production processes.

LABORATORY

Fully equipped with copower Lab Dispenser Machine 72 Bottles (Taiwan) – with X-RITE spectrometer.

SOFTFLOW DYEING

Fabric Dyeing - HTHP Softflow Dyeing. Production Capacity - 10Tons / Day.
Vessel Size - 1600, 1200, 1000, 700, 350, 100, 50, 25, 25

MONFONGS STENTER

PLC Controlled 8 Chamber Stenter Machine with arrangement of Gas Heating. Production Capacity - 16Tons/Day

CORINO SLIT OPENER

Corino Slit Opener machine with Openwidth Squeeze Mangle. Made in Italy. Production Capacity - 13Tons/Day

MAHLO WEFT STRAIGHTENER

With Online Control of Bow & Skew along with PLC and HMI Orthopac Remc -15. Distortion detection with high-tech smart camera (up to 70 picks/cm) in reflected light with highest detection performance.

PADDING DRYER

Padding Dryer Equipped With
* BENEKS DOUBLE DIP PADDING (TURKEY MAKE).
* EURO TECH DOUBLE DIP PADDING.
* SSYNGO RELAX DRYER
